

# Royale Owners Club

## Club information sheet

The Royale Owners Club was officially founded in February 1995.

It is an independent organisation, which means that the kit suppliers play no part in its running. The club is therefore free to express its own views about the products and companies. However, please be prepared for some bias as we have purchased the products.

The club has 3 main objectives within its constitution:

1. **To promote and encourage the building, ownership and enjoyment of Sabres, Dropheads and Windsors.** The club can assist with the technicalities of your build and spares availability by putting you in touch with Royale owners.
2. **To encourage the improvement of the standard of kit car construction by providing facilities for the exchange of news and technical information between the members.** The club has a technical co-ordinator who can assist with any problems/queries you may have. Technical information has been scanned and can now be sent electronically to members. The club also has an archivist who collates Royale history and records individual car details.
3. **To represent and safeguard the interests of members at kit car events and at other venues, committees, meetings etc as appropriate.** The club will attend as many shows as possible. This will enable potential owners to make face to face contact and inspect owner's cars.

The club will normally attend the main kit car show and reserve space for members to display their cars when available.

The club produces a quality magazine posted quarterly to all members.

The club organises annual holidays.

You are most welcome to join us by completing the Membership Form and returning it to the Membership Secretary.
